PRIZE WINNING NAVY ROTC FLOAT IN ANNUAL HOMECOMING PARADE.

# The PANTHER

## Prairie View A&M University

VOLUME XLVIII, No. 3

Prairie View, Texas

OCTOBER 11, 1973

### National Teacher Examinations Scheduled At PV In November

Less than two weeks remain for prospective teachers who plan to take the National Teacher Examinations at Prairie View A&M University on November 10, 1973 to submit their resignations for these tests to Educational Testing Service, Princeton, New Jersey, Dr. George H. Stafford, Director, Counseling Center announced today. Registrations for the examinations must be forwarded so as to reach the Princeton Office not later than October 18, Dr. Stafford advised.

**Bulletins of Information** describing registration procedures and containing Registration Forms may be obtained from Dr. Stafford or directly from the National Teacher Examinations, Educational Testing Service, Box 911, Princetown, New Jersey 08540.

At the one-day test session a candidate may take

the Common Examinations, which include tests in Professional Education and General Education, and one of the twenty-eight Area Examinations which are designed to evaluate his understanding of the subject matter and methods applicable to the area he may be assigned to teach.

Each candidate will receive an Admission Ticket advising him of the exact location of the center to which he should report, Dr. Stafford advised. Candidates for the Common Examinations will report at 8:30 a.m. on November 10, and should finish at approximately 12:30 p.m. Dr. Stafford said. Candidates for the Area Examinations will report at 1:30 p.m. and should finish at approximately 4:15 p.m., according to the time schedule for these examinations which has been set up by Educational Testing Service.

Despite Weather

### Over 10,000 Attend Homecoming Events

Over 10,000 former students and fans were on hand for Homecoming events Saturday at Prairie View A&M University.

The annual celebration started at the beginning of the week and continued through Sunday when annual religious services were dedicated to alumni and ex-students. Prairie View kept a long homecoming victory tradition by defeating Texas Lutheran College 17-6 in the annual football game.

A major feature of the annual event was the big parade which included en-

tries from schools and divisions of the college, along with both alumni and student participation. Floats and decorated cars carried the homecoming theme — "Pride Produces Productive People."

Miss Prairie View (Miss Eunice Cartwright) shared honors with four attractive ladies who served as Homecoming Queens. They represented reunion classes of 1933, 1943, 1953, and 1963. Mrs. Wilma Roligan Hogam of Houston represented 1933. Mrs. Evelyn J. Hardman of

See **HOMECOMING**, Page 2

## PV Students Participate In Waller County Parade

The annual Waller County Fair opens with an official parade Friday morning at 10:00 a.m. and PV students will be there in full force.

President A. I. Thomas and Miss Eunice Cartwright (Miss Prairie View) will lead the college units. The order of PV participation is as follows:

1. Prairie View Army Color Guard
2. Official Car To include President of the University Miss Prairie View
3. Army ROTC Staff
4. Army ROTC Drill Team
5. C. G. Marching Unit
6. Prairie View Car or Float with Queens
7. Army Car with Queens

8. Prairie View School Band
9. Prairie View Navy Color Guard
10. Anchorettes
11. Navy Drill Team
12. Prairie View Emergency Equipment

The off-campus parades committee includes:

- Dr. C. A. Wood, Chairman  
Mr. Vernon Black  
LTC Jiles P. Daniels  
Commander Reeves Taylor  
CPT. Henry L. Reed  
Capt. Billy J. McGowan, Parade Arrangements Coordinator  
Mr. Hubert Smith  
Dr. George R. Woolfolk  
Dr. S. R. Collins  
Rev. W. Van Johnson  
Mr. J. P. Mosley  
Miss Eunice Cartwright, (Miss Prairie View)

### Announcement of Graduate Fellowship Program

The Ford Foundation and the National Fellowships Fund are pleased to announce the following fellowship programs for the 1974-1975 year.

Graduate Fellowships for Black Americans

Graduate Fellowships for Mexican Americans

Graduate Fellowships for Native Americans

Graduate Fellowships for Puerto Ricans

These Fellowship programs are for students (a) who plan to pursue full-time study toward the doctoral degree in the Arts or Sciences or (b) who hold a first post-bac-

calaureate professional degree—such as the MBA, MPA, MSW or M. Ed.—and plan to continue on to the doctoral degree in preparation for a career in higher education. These fellowships are for one year only, but are renewable upon reapplication if satisfactory progress toward the doctorate is maintained. Applicants are expected to plan to study full time and to complete the requirements for the doctorate as soon as possible.

Check Panther Office for details.

### Homecoming Week

## It Was A Smash!!

By Larry Randolph

This year's Homecoming Week was a dynamic experience for everyone who took the time to enjoy themselves. Activities were planned and replanned for a week of explosive spirit-filled fun. The week was complete with floor-stomping sing-songs, eye-catching women, low-riding fellows, stomach-filling foods, and soul-stirring music.

Yes, classes went on during the day, and the early evening was set aside for studying and things of this nature, but when the sun went down,

it was time to P-A-R-T-Y! And to top it all off, our Panther football team pulled out their initial win of the season. Now that's what you call wrapping it up.

As we look ahead to bigger and even better activity weeks than this one, we can still anticipate the spirit of togetherness here at Prairie View. Each activity that we engaged in this week was highlighted by a sense of oneness exhibited by the students. Could you see it? Could you feel it? It was here.

Keep on Trucking

**REVIEWING STAND** — Special dignitaries, college officials and students watch annual Homecoming Parade from special stand in front of College Library. President A. I. Thomas is pictured

seated with homecoming queens, Miss P. V. and other alumni guests. The mile long parade featured student and community organizations, bands, floats, and all types of entries.

# Homecoming Weekend

CONTINUED from Page 1

Phoenix, Arizona was the 1943 Queen. Mrs. Dora Lee Upton Dabbs of Dallas was Miss P. V. in 1953 and represented that class. Mrs. Mary Ann Jolivet Dennis was the 1963 Queen.

The halftime ceremonies included presentation of the four Homecoming Queens, Miss Prairie View and her court, and other alumni dignitaries. The P. V. marching band, featuring "the foxes", performed at both pre-game and halftime. They provided a musical background for other halftime activities.

Leading up to Home-

Bicycle accidents in 1972 caused 1,000 deaths and more than 102,000 injuries, according to statistics released by The Travelers Insurance Companies.

coming Day itself were events which started Monday with a show presented by the Greek Letter organizations. A Block Dance was held Tuesday, a movie Wednesday and the usual Funeral for the opposing mascot on Thursday, followed by a picnic and dance. The big bonfire and pep rally last Friday evening set the tone for the big weekend.

**RADIO COVERAGE** - P. V. President, A. I. Thomas and Homecoming Queens Mrs. Evelyn J. Hardiman (Class of 1943) are shown being interviewed by Bennie Boone, KRBE Radio Announcer, during annual homecoming parade.

**MISS PV AND '43 GRAD** - Miss Prairie View (Eunice Cartwright), is escorted above by PV alumnus Leonard Wallace of California who was a President of a 1943 reunion class.

**HALFTIME CEREMONIES**—Miss Prairie View (Eunice Cartwright) and Homecoming Queens receive special gifts from PV President A. I. Thomas during halftime ceremonies at PV-Texas Lutheran football game. Pictured, from left, are Dr. A. I. Thomas, Miss PV, 3rd Cl. Norman Henderson, Margaret Penn, former Miss PV; Mrs. Mary Jolivet Dennis, homecoming queen (1963); Clifton Guillory and Mrs. Dora Upson Dabbs, (Homecoming queen-1953).

**CAMPUS QUEEN** — Wanda Carrier, sophomore co-ed from Houston, was one of many attractive queens in the Annual Homecoming Parade at Prairie View A&M University last Saturday.

We'll meet with college seniors and graduate students on 46 campuses this fall.

We're listening. To what new engineers and computer science graduates have to say. About their goals. About their professional responsibility to Spaceship Earth.

We're also talking. About the opportunities at Boeing this year. And the years that follow.

Frankly, we want the brightest graduates in the country to be inspired by our work and the Boeing environment. To feel a compatibility. And to rank Boeing as No. 1 job choice.

Before we get together, you should know a little about us.

Naturally, much of our business is related to the airline industry. Jetliner orders have come faster than we ever predicted. Orders

from the 727-200 have passed the 1000 mark. We've sold ten 707s to China. The 747 continues to be queen of the sky. And now the 747SP. We're also looking into a new jetliner now labeled the 7X7.

Boeing is involved in a number of defense programs, space projects, development of a short takeoff and landing (STOL) aircraft, and missile and helicopter production.

Boeing Computer Services, Inc., is concerned with general business and financial systems, medical systems, automated manufacturing techniques, inventory management, scientific and engineering problem solving techniques and computer operating system.

We have also started programs on: 1) people movers to help unclog traffic problems in cities; 2) hydrofoils to move people and freight over water faster; 3) reduction of aircraft noise; and 4) pollution control processes

that have application in desalination and as treatment of industrial waste. We are also at work on programs that can lead to a better understanding of this planet's natural resources.

If this sounds like the kind of equal opportunity employer you're looking for, please stop by your placement office and sign up for a personal interview.

Our interviewer will be on campus next week interviewing EE, ME and CE graduates.

**BOEING**  
Getting people together.

Come  
rap with  
Boeing.

## If you think Kodak is just pretty pictures, you ought to have your chest examined.

When a chest x-ray shows that you have a potential killer like TB or cancer, it's not a pretty picture. But it's an important picture because it can help the doctor detect and catch the killer in time.

When doctors are out to catch these potential killers, they want the sharpest, clearest x-ray films they can get. And that's why people at Kodak spend so many hours creating new and better x-ray film equipment. Already, the results in-

clude convenience for the patient, economy for the hospital, an even more useful tool for the radiologist—and, most important, reduced radiation exposure.

Researching and creating better x-ray films is good for our business, which is why we went into them in the first place. But it does our society good, too—which isn't a bad feeling. After all, our business depends on our society—so we care what happens to it.

**Kodak**  
More than a business.

## YOUR FOUNDATION FOR A FREE CHOICE

## PRIVATE PRESS SERVES PUBLIC

Now it is our turn to celebrate! The week, Oct. 7-13 is Newspaper Week. The theme is: "Newspapers: your foundation for free choice."

Your newspaper is a prime example of a private organization which serves the public interest. Independent, and free from government control, it is truly the public voice.

We play an important role in the life of the community. We give you the facts, thoroughly researched, so that you may depend on what you read.

We also provide a vehicle for our merchants to compete at the marketplace for your favor through constructive, informative advertising.

While our principal concern is to report to you the happenings at the local, county and state level, we feel it is an obligation to interpret those national issues which affect us here locally.

We do not expect all of our readers to agree with us in our reporting of the news, and we fully expect to be told about the differences. While it is almost impossible to be impartial in this day and age, we are determined to be fair and to win your respect. This is our objective.

## Deltas Get It On

Nina McClendon

The Eta Beta Chapter of Delta Sigma Theta Sorority is anticipating another eventful and successful year. A new slate of officers that will be influential in helping to put the year's program into full swing is comprised of Soror Alfreda Charles, President; Soror Lillian Gosey, 1st Vice-President; Soror Carolyn Greenleaf, 2nd Vice-President; Soror Wanda Palmer, Secretary; Soror Nina McClendon, Corresponding Secretary; Soror Wanda McAfee, Treasurer; Soror Carolyn Hill, Sgt. at Arms; and our sponsors are Misses

Cheryl and Thetis Edmond. Rush Party '73" was a tremendous success. Its theme, "Getting It On With Delta and The Love Condominium" provided the many prospectives with an hour of entertainment as well as enlightenment about this nationwide organization. True to their motto, "Intelligence is the Torch of Wisdom," Eta Beta was proud of its sixteen Sorors who appeared on the President's Honor Roll for the Spring semester. Honor Roll Delta Sorors who received certificates and trophies were Alfreda Charles, Mary Granger, Judy Peters,

"I want you to take particular note-my seat belt is still fastened."

Lovie Teal, Dimitria Wilson, Wanda McAfee, Nina McClendon, Helen Washington, Deborah Barron, Viola Bess, Daryl Brown, Shirley Bryant, Cynthia Carter, Janice Gamble, Lillian Gosey, and Bettye Mitchell.

In October, the Sorority will sponsor a Halloween Carnival at the Newman Center for the local youngsters.

Crossing between intersections is still the leading cause of pedestrian traffic deaths. This habit, according to The Travelers Insurance Companies, killed nearly 4,000 and injured more than 67,300 pedestrians last year.

In 1972 there was a discouraging reversal of the downward trend in traffic fatalities of 1970 and 1971. Last year, more than 55,700 persons died in traffic mishaps, according to The Travelers Insurance Companies.

## PROBLEMATICAL RECREATIONS -9.

A ball is dropped from a height of 10 feet. It rebounds one-half the distance on each bounce. What is the total distance it travels?

## Find out if the chemistry's right.

At Du Pont, the best chemistry is people chemistry.

Anything can be achieved if you have the right people and they talk to each other.

So we look at you as much as at your grades.

We look for compatibility as much as talent.

And that goes for engineers and chemists as well as business students.

If you want to find out what fields

have openings, what states you can work in and more, meet with the Du Pont recruiter when he comes to your campus.

Or if you've already graduated and have experience, write Du Pont direct, Room N-13400, Wilmington, Del. 19898.

And as you know by now, we're equally interested in women and men of any color.

The chemistry is what counts.

An Equal Opportunity Employer M/F

## Kollar Korner

### Real Peace

Listen to these words: Peace I leave with you, my peace I give unto you; not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid.

We are tired of the strife within our lives, of the troubles of our hearts. We want peace but we don't have it. Many people are conducting a life war, and it is as a war on four fronts.

First, there is the strife with ourselves. We insist on having our own way, of doing as we please, of deciding our own lives. But after a time the "doing as we please" fails to please. We are not satisfied with what we have accomplished.

We are ashamed of many things we have done. Our conscience contains guilt. We begin to hate ourselves. There is the strife within ourselves.

Second, there is the war with our world. Things don't go right. We feel we are missing the boat. Other people seem to get all the breaks. We struggle we work hard, but our accomplishments are small and meager. Things don't go right.

Third, there is the war with other people. We don't have the friends we would like to have. People misunderstand us, they slight us; there seems to be a barrier between us and the people we live and work with.

Fourth, we are at war with God. Maybe we feel God is unconcerned about us, or maybe there is simply no feeling of fellowship with God.

By Rev.  
W. Van  
Johnson  
Dean of  
The Chapel

We would like to pray but it seems useless. We may even begin to doubt the existence of God. And yet we want peace - peace with ourselves, with our circumstances, with our fellow men, with God.

Jesus said, "My peace I give unto you." When we get his peace, we gain peace in every area of our lives. The main question is: How can I have Christ's peace?

There are four steps we must take:

(1) We must give up anything and everything in our life that we believe Christ would not approve. Think slowly over your way of life. Don't dodge, excuse yourself or beg off. Be honest, anything you feel Christ would not approve, give it up.

(2) Give up yourself to Christ. Instead of being self-centered you must become centered in him. The big question in the Christ-centered life is not "What do I want to do?" but rather "What does he want me to do?" Christ will walk with you only so long as we are willing to walk his ways.

(3) Accept what he then offers you — His forgiveness and his power. In the past you have made mistakes and done wrong. He forgives you. That means the past is not against you, and accepting his forgiveness means that you are willing to forgive yourself.

## Post Doctoral Research for '74

The National Research Council announces the Research Associateship program for 1974. These programs provide scientists and engineers with opportunities for postdoctoral research on problems in the fields of Chemistry, Space Sciences, Physics, Atmospheric & Earth Sciences, Engineering, Life Sciences, and Mathematics.

These programs are conducted on behalf of and in cooperation with certain federal research organizations with laboratories at more than 80 geographic locations in the United States.

Appointments are made on a competitive basis and are open to recent recipients of the doctorate and in some cases to senior investigators. Some are open to non-U. S. citizens also.

Approximately 250 awards will be made in 1974. Stipends (subject to income tax) will range from \$13,000 upwards. Grants will be provided for family relocation and for professional travel during tenure.

Applications must be postmarked by January 15, 1974. Awards will be announced in April.

Further information concerning specific re-

In accepting his forgiveness one receives spiritual power which enables us to face the future with confidence.

(4) Take your stand for Christ before others. That means that you will be the same outwardly that you have become inwardly. These four steps will give us blessed peace.

## GM Donates Auto Transmission to PV

14th Million transmission produced by GM.

Mr. D. Fontenot, head of the Automatic Technology Department at Prairie View A&M University, reports that Buick Motor Division of General Motors Corporation produced its 14 Millionth Automatic Transmission on April 13, 1973. It was placed on exhibit in Flint, Michigan for several weeks, after which a group of Buick officials met and agreed to donate the Transmission to Prairie View A&M University's Automatic Technology Department, for instructional purposes.

The transmission was accepted, for Prairie View, by Mr. Monroe Elliott, who is obtaining on the job training at Buick Division. He started his training at Buick on January 2, 1973, as a co-op student. He will alternate work and school periods between Prairie View and Buick.

Elliott is an automotive technology major, at Prairie View, and plans to put his academic training to work at Buick and thereby work toward a career in the automotive industry.

Buick is paying Elliott a starting monthly salary of \$500.00 to \$750.00 and pays his round trip travel expenses between Prairie View and Flint, Michigan.

apply for this program as the environmental field is interdisciplinary. If you are interested, write: The Youth Advisory Board, EPA, Region VI, 1600 Patterson St., Suite 1100, Dallas, Texas 75201.

## Environment Protection Agency Seeks Youth Board Members

The Environmental Protection Agency is seeking people, 18-25, to serve on its Youth Advisory Board (YAB). In its third year, the YAB obtains the youth's perspective on environmental issues. Presently, the year-round activities are divided into school year and summer segments.

Summer activity consists of an internship in which the person is actively employed by the Agency. This summer position will complement the Board member's academic and extra-curricular interests as well as familiarize the person with the functions and the mechanics of the

EPA's role in achieving a better environment.

The school year's activities consist of acting as a liaison for the EPA. This provides an agent for a two-way flow of information between the Agency and its region. At this time, the Board members may use creativity and initiative in constructing and carrying out worthwhile projects in their respective schools.

Qualifications for the YAB members are based upon academic and environmental achievement as well as a willingness to work. The Agency encourages all interested persons, regardless of academic major or career goals to

## Driver Education News

During the spring of 1973, Mr. Eugene Jackson received an educational grant for advanced study in the area of Safety and Driver Education. The grant sponsored by the Texas Education Agency, was designed to provide advanced study and skill enrichment for college and university teachers of Driver and Traffic Safety Education.

Mr. Jackson, Head of the Safety and Driver Education Department in the School of Education and Technology at Prairie View A&M University, was enrolled for the 1973 summer session in the graduate program at Texas A&M University. Specific areas of instruction in the program were: 1) Innovations in Traffic Safety Education; 2) Behavior Patterns; 3) Alcohol and Traffic Safety Education; and 4) Professional Development in Traffic Safety Education. The Professional Development course included

tion. The Professional Development course included a Motorcycle Workshop Institute for educational personnel responsible for preparation and instruction of material for Driver and Traffic Safety Education programs.

The Motorcycle Workshop Institute was a product of the Motorcycle Industry Council Safety Foundation. The Foundation was organized in 1972 and its membership includes representatives of the six leading motorcycle manufacturers of America: Honda, Yamaha, Suzuki, Kawasaki, Harley-Davidson, and BSA. The members' decision to commit their financial resources to motorcycle safety and education programs was made after an intensive study was conducted by a private research organization.

The basic goal of the Foundation is to develop a performance-based curriculum package for safe motorcycle operation. It is anticipated that such a curriculum and related educational materials will be used in public schools, military installations, and variety of community settings.

The first project implemented by the Foundation

was the Motorcycle Workshop Institute attended by Mr. Jackson. In cooperation with 10 universities throughout the nation, the Foundation has prepared an estimated 150 college instructors in the field of motorcycle safety and education. It is hoped that these instructors will now train high school driver education instructors, thereby quickly increasing the number of qualified instructors available to meet the rapidly increasing demand for instruction in safe motorcycle operation.

It is estimated that more than 70% of all motorcycle accidents involve riders with less than six months riding experience, regardless of the cyclists' age. This act alone substantiates the need for developing and implementing a high quality motorcycle operator training program.

The Foundation's program also seeks to assure that automobile drivers learn to interact safely and effectively with motorcyclists in traffic. A Seq DRIVER EDUC., Page 8

## TED MOODY IS LEARNING HOW TO FLY

"He's a classy guy. Always went all-out." These are the words of one of the Dartmouth football coaching staff about Ted Moody, a former star linebacker. Ted graduated from Dartmouth College in '72 with a degree in Economics and a mission in mind . . . to be a pilot . . . A Naval Aviator.

Now Ted Moody is going all out again. This time in Pensacola, Florida as a Naval Aviation Officer Candidate. He is finding out what it takes to be a Naval Aviator. He's finding it takes a lot of classroom work and long hours studying. It takes a lot of work on PT fields and obstacle courses. It takes special training like the parachute slide and the land survival mission in which you must hunt your own food and erect your own shelter. It takes a lot of time in a cockpit and even some old fashioned close order drill. And it takes a lot more. But, most of all, it takes the right kind of man.

No, you don't have to play football to be a Naval Aviator, but you do have to have a college degree and a lot of drive. And, when the

time comes for you to wear your "Navy Wings of Gold" you will know what it takes. It takes your best!

For more information on what it takes to become a Naval Aviation Officer Candidate call, toll free: **800-841-8000**. (In Georgia, call 800-342-5855) or mail in the attached coupon. Be someone special.

Ronald collects valuable Land-Use information from field studies of Prairie View's Soils.

## PV Graduate Student Off To Washington On Work-Study Program With A.I.D.

Ronald D. Harvey, Graduate student in Agriculture, (Soil and Plant Science) is one of the five graduate students selected from across the nation to participate in a three month work-study program with the Agency for International Development. He is a May 1972 graduate of Prairie View with a B. S. in Agriculture (Animal Science). He entered Graduate School at Prairie View in June of the same year. Since then he has traveled to Puerto Rico where he studied for one summer session at the University of Puerto Rico and he has just recently returned from Hawaii where he participated in a Soil Mineralogy Workshop at the University of Hawaii.

Ronald's duty in Washington will be to work directly with A. I. D. Technical Assistance Bureau for Foreign Countries. His

area of specialization is Tropical Soils Management. Upon completion of this assignment, he will then return to Washington for another three-month duty period which will probably take him overseas. During his period of duty, he has been granted three (all expenses paid) round trips to Washington to be taken at his discretion.

In addition to being selected to participate in this program, he is scheduled to present a paper at the National Meetings of the American Society of Agronomy which is to be held November 11-16, 1973, in Las Vegas, Nevada.

Ronald is a member of Alpha Tau Alpha Agriculture Education Fraternity, P. V. Chapter of Sigma Si National Research Fraternity, President of P. V. International Graduate Students' Club of Agriculture.

# PV Over T.L.C.-"It's Alright Now"

by Larry Randolph  
It took a little while, but the Panthers finally came out of the bag with their first win against Texas Lutheran by a score of 17-6 this past Saturday. But the most delightful thing about it is that, they did it for Homecoming, to make a most soulful week complete.

As you could readily see, we seemed to have a whole

different team playing this game, for the offense certainly attempted to patch up the holes they dug for themselves the last time they were home. Quarterback Steve Francis was able to keep the offense moving as Tony Harris and Harvey Hardeman kept a relentless pursuit going for a touchdown which was brought on by Harris in the middle of the 1st quarter.

Both teams suffered fumbles and penalties throughout the game. But in spite of this handicap, before the end of the first half, the Panthers' Eddie Riley was able to chalk up 3 more points for a 10-0 lead at halftime.

Then our souls were just settling down from a magnificent program by band and presentation committees, when Harvey Hardeman aided his companion in progress for another touchdown that made the score 17-0. It was not until late in the 4th quarter that Texas Lutheran managed to make the score 17-6.

The game was bigger and better than the first game, and as was predicted, our level has certainly risen because improvement has presented itself to Pantherland by this great football team.

## Driver Educa.

CONTINUED from Page 6

North Carolina study found that among motorcycle accidents involving another vehicle, the driver of the car was at fault 62% of the time.

Through integrated program efforts, the University will seek to assist automobile drivers and future teachers of Driver and Traffic Safety Education to understand the dynamics of motorcycle operation and interaction, and to develop the share-the-road philosophy that is apparently lacking in too many instances today. At a later date, it is the aim of the Safety and Driver Education Department to offer formalized instruction in motorcycle safety to high school driver education teachers. An immediate attempt will be made to provide greater emphasis on the cyclist as a road user in the driver education program at Prairie View A&M University.

## SWAC Football Report

Games played in SWAC football on October 9, 1973

**TEXAS STATE OPTICAL**  
Associated Doctors of Optometry

**Come around.  
Taste the gusto of Schlitz.**

You only go around once in life.  
Why settle for less?  
When you're out of Schlitz, you're out of beer.

**GREEN GRAIN COMPANY — BRENHAM, TEXAS**
